KEYPOINT LAW

NEW WHISTLEBLOWER REGIME: WILL YOU BE COMPLIANT BY 31 DECEMBER?

The new whistleblowing regime came into effect on 1 July 2019, and requires all large companies and publicly listed entities, amongst others, to have a Whistleblower Policy in place before 1 January 2020. You need a strategy to ensure that your organisation is compliant. Keypoint Law's one-stop shop can help you meet your obligations.

OUR OFFERING INCLUDES:

1. **Policy development:** We suggest all companies have a policy as they are still required to abide by the law.

2. **Training:** Will your staff know how these changes impact them? Do your senior employees know their obligations as recipients of disclosures? Training is a critical and often overlooked part of the compliance journey.

3. **Disclosure management:** Policies and training alone are not sufficient: your handling of any incidents must also follow an appropriate process.

4. **Online reporting and management:** We can provide a system for secure, anonymous communications with any potential whistleblower. This will provide a safe mechanism to deal with all disclosures protected under the legislation.

5. **Audit:** We can undertake a thorough review of all relevant policies and procedures and provide you with a simple and easy-to-follow roadmap to compliance.
